Thanks again for digging out those files – I hope they will contain some useful information.

Donna is on vacation and will only be back next week. I did contact one of our attorneys and asked that they take a look (which they agreed to do) but I haven't heard back yet – I'll follow up this morning and will let you know as soon as I hear anything back from her.

It's great that Julia and Billy are joining the Corps for the site visit!!

Later,
Hadas

1. Right now only the on-site documents that I thought were of value are being turned into pdfs. There was a fair amount of minor corrections and contact information exchanged that I did not send for conversion.

Those 1973 – 1989 files are the ones that looked like they may be most interesting – since the time frame addresses the earliest permitting. I'll have Meghan call back all of the boxes and after looking at the files, I can decide what to do with the information; if the files are not of value we can just send them back. The description of archived files definitely is lacking and not very useful.

2. Have you asked Donna to look at the letter from the Climax attorneys and review the arguments?
3. Billy and Julia are going up to Fremont Pass (where the mine is) early tomorrow, I reminded Billy of Mike Finan's comment to not start talking about jurisdiction and permitting but not to let the company distract them from the point of the visit, which during this visit is delineation and reviewing the wetlands in the landscape. Sarah is possibly going up for a pre-app meeting on Friday. It will depend on what gets done this week.

Are all the files below being transferred to PDFs regardless? This one seems like it might be a very early one – I'm just not sure what information is in the file...

412-01-0116 2 of 7 CO0000248 Climax Molybdenum Co. 1973-1989

I have asked the EPA records staff to look at what the Region has in our files. We do not seem to have any value added maps or figures in our on-site files. I have the 1988, 93 and 98 permits and what appears to be a variety of correspondence. The records staff has looked up what has been archived. I am having the earlier permits and rationales that I found transferred to pdf files for the use of the EPA and Corps.

Hadas and Erin I can request the archives be returned to the region if you feel there may be something of use in the files, the descriptions of the files is somewhat vague. It is also possible that some of the files have been destroyed.

The federal archive has the following files

412-99-0088	1 of 8	CO0000248, Climax Molibdenum Co 1992-94, 5/96
412-99-0092	1 of 16	CO0000248 CLIMAX MOLYBDENUM COMPANY 1988-91
412-01-0001	1 of 9	CO000248 CLIMAX MOLYBDENUM CO. 1982-1988
412-01-0116	2 of 7	CO0000248 Climax Molybdenum Co. 1973-1989
412-02-0156	5 of 8	CLIMAX MOLYBDENUM
412-02-0381	3 of 19	FOLDER 128: CO0000248 CLIMAX

I have not decided if I want to retrieve anything from the archives. If you would like to see anything please tell me, it will take a bit of time to get the boxes.

The state of Colorado is checking their files for value added content tomorrow.
